

FROM AFRICA TO ASIA- MY GMBA EXPERIENCE

Life as an MBA Student; Action learning, along with the culture of empowerment and student initiative, results in a unique and intensive two years for very individual. Every experience can be tailored to your own unique interests and goals.

Transformative Experiences; The level of energy, world-class faculty, knowledge imparted, and entrepreneurial spirit at GMBA may surprise even students who expect the best. The overseas internship and exchange program integrates academic research with business relevance: classroom activities with industry interactions.

A Culture of Working Together

The students I interacted were incredibly smart, accomplished, and driven. That is common among top business schools. What struck me as truly unique about GMBA was how down-to-earth, humble, and genuine students were as well. I could tell that they here weren't concerned about flash and image, but were concerned about showing up, working hard, increasing their impact, and doing what it took to achieve their goals.

Leadership Is the Result

At GMBA, you will be involved in international business plan completions which you will directly control and shape your experience. Leadership is a direct outcome of the experience. Everything that gets done there is a result of a student having some involvement in it.
